Author Index Volume 108 (1999)

Barrenechea, A.L., see **Téllez, M.A.A.** 31– 40

Cabada, A., J.J. Nieto and **R.L. Pouso,** Approximate solutions to a new class of nonlinear diffusion problems 219–231

Capizzano, S.S. and **P. Tilli,** Extreme singular values and eigenvalues of non-Hermitian block Toeplitz matrices 113–130

Chapko, R., On the numerical solution of direct and inverse problems for the heat equation in a semi-infinite region 41– 55

Chiou, J.C. and **S.D. Wu,** On the generation of higher order numerical integration methods using lower order Adams–Bashforth and Adams–Moulton methods 19– 29

Dattoli, G., S. Lorenzutta, A.M. Mancho and **A. Torre,** Generalized polynomials and associated operational identities 209–218

Farkas, H., see **Simon, P.L.** 157–176

Kim, S.-C. and **J.-Y. Lee,** A high-order adaptive numerical method for recirculating flows at large Reynolds number 75– 86

Lee, J.-Y., see **Kim, S.-C.** 75– 86

Li, C.W., see **Liu, X.Q.** 1– 17

Liu, X.Q. and **C.W. Li,** Product expansion for stochastic jump diffusions and its application to numerical approximation 1– 17

Lorenzutta, S., see **Dattoli, G.** 209–218

Mancho, A.M., see **Dattoli, G.** 209–218

Meijer, H.G. and **M.A. Piñar,** Asymptotics of Sobolev orthogonal polynomials for coherent pairs of Jacobi type 87– 97

Mitrouli, M., see **Yalamov, P.Y.** 99–111

Nieto, J.J., see **Cabada, A.** 219–231

Piñar, M.A., see **Meijer, H.G.** 87– 97

Pouso, R.L., see **Cabada, A.** 219–231

Sakai, K., A nonoscillatory numerical scheme based on a general solution of 2-D unsteady advection–diffusion equations 145–156

Santos-León, J.C., Product rules on the unit circle with uniformly distributed nodes. Error bounds for analytic functions 195–208

Shibutani, N., Integrable discretization and its applications 57– 73

Simon, P.L., H. Farkas and **M. Wittmann,** Constructing global bifurcation diagrams by the parametric representation method 157–176

Simos, T.E., An exponentially fitted eighth-order method for the numerical solution of the Schrödinger equation 177–194

Siyyam, H.I., see **Syam, M.I.** 131–144

Syam, M.I. and **H.I. Siyyam,** Numerical differentiation of implicitly defined curves 131–144

Tilli, P., see **Capizzano, S.S.** 113–130

Téllez, M.A.A. and **A.L. Barrenechea,** A relation between the kth derivate of the Dirac delta in $(P \pm i0)$ and the residue of distributions $(P \pm i0)^{\lambda}$ 31– 40

Torre, A., see **Dattoli, G.** 209–218

Wittmann, M., see **Simon, P.L.** 157–176

Wu, S.D., see **Chiou, J.C.** 19–29

Yalamov, P.Y. and **M. Mitrouli,** A fast algorithm for index of annihilation computations 99–111
